

# FINISHES | decorative surfacing

## PANELS NEVER LOOKED SO GOOD

Having the right finish for your panel applications is easy with Flakeboard\*. We offer one of the largest selections in the industry - from TFM and decorative paper overlays to custom direct prints and paint. You can choose from an array of solid colors, prints and woodgrain styles. Whatever your needs, we have the finish that's right for you.

We offer:

**Direct print** - Using a 9-stage, wet coat process and high quality printing inks, our custom woodgrain prints are an ideal and economical choice for casebacks and drawer bottoms.

**Decorative paper overlay** - We offer a variety of top-coated, solid (smooth or stippled) and woodgrain décor paper finishes that can be applied to FIBREX®, Mende thin particleboard or standard particleboard. Paper overlays are ideal for drawer bottoms and cabinet backs for furniture.

**Paint** - Our conventionally cured, water-based, multi-coating paint system is available for our FIBREX® and Mende product lines, and is suitable for caseback and drawer bottom applications to name a few. Flakeboard also offers silkscreenable paint finishes for interior signage and advertising media, as well as chalkboard paint for domestic applications.

**TFM** (thermally fused melamine) - The Flakeboard Collection includes more than 80 melamine designs, along with hundreds of Specialty design choices. TFM melamine upgrades include WRM (wear resistant melamine), for enhanced wear and durability, and embossed textures to add a natural look to your design. Available TFM substrates include particleboard, MDF and FIBREX® (thin HDF). For your speciality projects, ask for Duraflake® particleboard or Premier® MDF available in FR (fire rated) or MR (moisture resistant).

Flakeboard also offers dynamic complementary programs, **Fusion** and **Design Symmetry**, developed to match our designs to high pressure laminate, RTF/vinyl, direct print, paper overlays and edgbanding! Visit our website for more information or contact us directly.

\*Please note: Finishing capabilities vary by mill, please contact your Sales or Account Representative for availability.

- Panels comply with CPA EPPS 3-08 and CCR 93120.2(a) (CARB Composite Wood ATCM Phase 1 Formaldehyde Emission Limits)
- Material Safety Data Sheets are available upon request
- All panels are approved for use in interior, non-structural applications
