Contour White WF355

In today's markets, Unicolors have defined contemporary design. Contour White takes this trend to another level by adding a unique characteristic movement to a flat surface. The movement and shadows' play give this design a special elegance and depth; giving spaces a more comfortable and natural feel. It works in modern cabinet door applications, retail fixtures, contemporary furniture, and in combination with other Unicolors.

Driftwood WF356

Sandalwood WF357

The light-medium "Sandalwood" and darker "Driftwood" versions of this decor help lead the way in the current trend toward overall warmth in interior color choices. Gray is both a classic and contemporary design element, and the addition here of strong brown tones serves to heighten the visual impact and versatility of both color ways. Each version will fit seamlessly into many different interior schemes, both residential and commercial.

Peppered Crosswood WF358

Umber Crosswood WF359

Saddle Crosswood WF360

Modern and trendy, yet welcoming, it is the intersection of soft lines that gives this design its warm feel. The blending of a modern Oak design, with the slight effect of a saw cut wood, creates a striking and authentic appearance. Linear, simple, and stylish, this design is suitable for multiple markets and surfaces.

For samples and further information on complementary RTF/3DL, EB, Molding/5 piece doors and HPL coordinated matches please contact your account representative.

Designs are available in several textures, please specify Suede, AuthenTICK or Medina (St. Stephen, NB only) when requesting samples.
